

Şu Anda Lazım Olan Şey

Bir marketer / growth operator'ın:

- competitor positioning'i analiz edip
- whitespace çıkarıp
- landing'i yeniden yazabilmesi.

Bu kadar.

Şu Anki Doğru Setup

Amaç

Şunu bulmak:

“LeadAC hangi category'ye giriyor ve hangi category'yi yeniden tanımlıyor?”

Basit Founder Workflow

Tool Stack (Manual)

Amaç	Tool
Competitor SEO	Ahrefs trial / SEMrush
Homepage archive	Firecrawl
Reddit mining	Reddit search
SERP discovery	DataForSEO veya SerpAPI
Copy storage	Notion/Airtable
Clustering	ChatGPT/Gemini
Landing writing	Figma/Webflow/Next

Bu yeterli.

Gerçekten.

Sana En Optimize Süreci Vereyim

STEP 1 — Competitor Map

Marketer'ın ilk işi:

Şu şirketleri analiz etmek:

Type	Companies
Sales intelligence	Apollo, ZoomInfo
AI outbound	Instantly, Smartlead
GTM infra	Clay
Revenue intelligence	Gong
SMB/local adjacent	Birkaç restaurant SaaS

Çıkarılacak Şeyler

Spreadsheet:

Company	Main Headline	Core Positioning	Repeated Keywords	ICP
---------	---------------	------------------	-------------------	-----

Örnek

Apollo:

Headline:

“Find leads, close deals.”

Repeated keywords:

- leads
- database
- outreach
- engagement

NO:

- local SMB
- intent timing
- operational signals

BOŞLUK burada.

STEP 2 — Keyword Discovery

Tool

[DataForSEO](#)

veya

[Ahrefs](#)

Aratılacak Seedler

restaurant sales
restaurant outreach
local business leads
AI SDR
cold email
restaurant marketing

sales intelligence
Apollo alternative

Çıkarılacaklar

Keyword Intent Pain Opportunity

Örnek

Keyword	Insight
AI SDR	overcrowded
restaurant	underserved
prospecting	
local business	good
outreach	
operational signals	whitespace

STEP 3 — Reddit Pain Mining

BU EN ÖNEMLİ STEP

Tool bile gerekmiyor.

Google’da ara:

site:reddit.com Apollo bad data
site:reddit.com restaurant owner outreach
site:reddit.com cold email low reply rate

Çıkarılacaklar

EXACT language.

Örnek:

- “Apollo gives data, not buyers.”
- “Restaurant owners never reply.”
- “Cold outreach feels random.”
- “Most local businesses ignore LinkedIn.”

Bunlar:

landing headline olur.

STEP 4 — Messaging Clusters

Şimdi marketer:

tüm cümleleri cluster’lar.

Cluster örneği

Cluster 1 — Generic AI SDR

- automate outreach
- AI SDR
- sales automation

→ overcrowded

Cluster 2 — Intent Timing

- ready to buy
- operational signals
- review spikes
- timing matters

→ whitespace

STEP 5 — Positioning Decision

Burada founder-level karar verilir.

LeadAC:

NE DEĞİL?

- ✗ CRM
- ✗ generic AI SDR
- ✗ outreach sender
- ✗ sales automation suite

LeadAC:

NE?

- ✓ Intent intelligence for local business outbound
- ✓ Signal-based prospecting
- ✓ Local SMB buying signals
- ✓ Operational intent engine

STEP 6 — Landing Rewrite

Şimdi landing:

feature-driven değil,
narrative-driven yazılır.

Hero Structure

HEADLINE

Problem reframing.

Örnek:

Most prospecting tools know the business exists.

LeadAC knows when the business is ready to buy.

SUBHEAD

Operational signal explanation.

Detect buying intent from reviews, growth signals, delivery changes, and operational activity across local businesses.

CTA

Find High-Intent Restaurants

STEP 7 — Vertical Pages

BENCE EN ÖNEMLİ MOVE.

Generic homepage yerine:

/for/restaurants

/for/cafes

/for/bars
/for/dental

Bu:

“another AI SDR”
algısını öldürür.

Çünkü artık:

- specific pain
- specific triggers
- specific signals
- specific outreach

var.
